ECFiber is the trade name of the District's ISP business

Internet Café / WiFi Hotspot Memo Of Understanding

The East Central Vermont Telecommunications District (ECFiber) wishes to provide its high-speed fiber-optic Internet service to visitors of <Town> _____ and local residents who do not have internet service at their homes.

In order to achieve this, ECFiber proposes to partner with _____ [Business] to create and maintain an Internet Café / WiFi Hotspot at its primary place of business.

Internet Café / WiFi Hotspot. A Café or Hotspot is a place where patrons and visitors to the Business can use their digital devices (computers, tablets and smartphones) to log into the Internet and access any available service free of charge. The Internet Cafe is open during the normal operating hours of the Business.

Services Provided. ECFiber proposes to provide its "Wicked Fast" Internet to the Business as two distinct and separated services:

1. A private, connection to the Internet suitable for the secure connectivity needs of the Business.
2. A public, unsecured WiFi connection to the Internet available to any patron of the Business.
ECFiber will manage the infrastructure broadcasting the public WiFi connection.

Cost. The cost of the Internet service provided by ECFiber under the terms of this Understanding will be equal to the "Business Standard" Internet service provided to other subscribers. The service will be billed monthly under the terms of the standard ECFiber Service Level Agreement.

Conditions. To maintain this Understanding, the Business agrees to display the "ECFiber Internet Café" sticker in a front display window or other mutually satisfactory prominent location. The Understanding will continue as long as the sticker remains displayed as agreed and the WiFi connection remains open to the public.

Term. This Understanding will automatically renew annually unless 30 days written notice is provided to the other party.

Termination. If the Understanding is terminated for any reason, the Business can purchase ECFiber service under the same terms available to any other business in the District.
